## Our Cycle to School a midst the Closure of Schools

The bicycles were repurposed by the parents & students for income generating activities as they wait for the schools to open

In the photo is Mudondo Gorret, a Student of Lubani Secondary School, in form two & a beneficiary of the Cycle to School Project. Mudondo is using her Bicycle to help her mother in fetching water to irrigate their crops (beans) . The beans will be sold after harvest and this money will be used to pay her school fees when schools resume.

***I feel good that my daughter is helping me to fetch water , to irrigate our crops (beans). Am optimistic that i will be able to harvest roughly 8 sacks (100kg) totaling to between 1,000,000shs Million to 800,000shs if we sell a kg at 1000shs to 1500shs. I intend to use that money to pay for my daughter's School fees and some other home needs. Says " Ms Nabirye Sarah, a mother to Gorret"***

**Below are some of the Bicycles handed over to our Student Beneficiaries in Butagaya Community under our Cycle to School Program**

***Donate one  
Bicycle to a  
vulnerable family  
/student and save  
her from dropping  
out of school at a  
tender age***
