

Delivery e-bike

"My name is Bwambale Selevestor, I work in the delivery unit of Hotel Paradise in Jinja City and a beneficiary of the delivery e-bike.

"My life before receiving the e-bike was frustrating. I am excited to say that the e-bike is a life changer."

I used to spend about 300,000 shillings monthly on fuel, which meant that I saved a limited amount of money. Additionally, the rate at which the fuel costs were rising was worrisome to the extent that life had become hard since I often spent 90% of what I earned. My boss was also frustrated with the fuel costs since I often used a motorcycle and the fuel consumption rate was high.

I am happy to have this e-bike because it has saved us from spending a lot of money on fuel. Now I can practically save at least 14,000 shillings a day. The bike is cheap to work with, very efficient, strong and unique. **It is environmental friendly because it doesn't emit any fossil fuels.**

"The e-bike has offered a solution to the rising fuel costs. At least I can now save a reasonable amount of money"

Selevestor on his way to deliver some products

I can now swiftly move to a number of destinations each day with ease and without worrying about fuel costs.

I am grateful for this opportunity because apparently the impact in my earnings is a great one and I believe by the coming year, the impact will be even greater. Thank you FABIO and EURIST for the commendable efforts towards transforming lives."
